## COIL SPRUNG UPHOLSTERY CONSTRUCTION & MATERIALS

### Traditional Eight Knot Hand Tied Coil Sprung Base

- ❁ Superior quality frame constructed of Chinese hardwood.
- ❁ Plywood cladding is used for additional durability.
- ❁ Seats have insulated **Coil Springs** which are individually 8-way hand-tied into the upholstery frame for maximum support and comfort.
- ❁ Strong elastic webbing is used to support luxurious polyester filled back cushions to ensure maximum comfort.
- ❁ Seats are constructed of foam and polyester fibre. The foam directly contacting the coil springs is of a high density foam. An additional softer foam layer is then used and finished with a polyester fibre top for maximum durability and comfort

Materials comply with The Furniture and Furnishings (Fire)(Safety) Regulations 1993.
